

HomeTroller™ Home Automation Controller

Automate Your World with the HomeSeer HomeTroller™

Our new HomeTroller is an advanced home automation controller that's designed to simplify your life by integrating and automating the major systems of your home! Use it to monitor and control lighting, appliances, climate, security, telephones, irrigation, window shades and home entertainment equipment.

- **Keep tabs on your home while you're away!**
- **Ensure your family is safe!**
- **Receive announcements, alerts and reminders!**
- **Conserve energy and lower utility bills!**
- **Retrieve phone messages by web or phone!**

HomeTroller supports the widest variety of user interfaces available. Choose from in-wall button controllers, touchscreens, wireless remotes, microphones, PDAs, PocketPCs, telephones (voice and touch-tone control) and personal computers. Mix and match any combination of interfaces you like to suit the needs of your family.

The built-in web server allows you to access your home while you're away at work or on vacation. Easily keep tabs on your home and family with any web browser. Receive emails or calls when things happen at home or people come and go.

Now you can finally have the peace of mind that comes from knowing your family and home are safe and secure!
