

HomeTroller Zee Home Automation Controller

Automate Your World with the HomeTroller™ Zee

Our new HomeTroller Zee is an advanced home automation controller that's designed to simplify your life by integrating and automating the major systems of your home! Use it to monitor and control lighting, appliances, door locks, thermostats, window shades, water heaters, valves and more!

- **Keep tabs on your home while you're away!**
- **Ensure your family is safe!**
- **Receive announcements, alerts and reminders!**
- **Conserve energy and lower utility bills!**
- **Remotely control door locks and thermostats!**

HomeTroller supports the widest variety of user interfaces available. Choose from multi-button scene controllers, touchscreens, tablets and smart phones! Mix and match any combination of interfaces you like to suit the needs of your family.

The built-in web server allows you to access your home while you're away at work or on vacation. Easily keep tabs on your home and family with any web browser. Receive emails or text messages when things happen at home or people come and go.

Now you can finally have the peace of mind that comes from knowing your family and home are safe and secure!

Key Features

- Built-in web server for remote access anywhere.
- Easy-to-use web interface allows easy access and control with any web browser.
- Supports the widest variety of user interfaces, including wall controllers, touchscreens, smart phones and tablets.
- Compatible with Z-Wave® and X10 technology.
- Designed for voice control by mobile device.
- Creates alerts, announcements and reminders by email and text message.
- Includes calendar-based functions for easy scheduling.
- Automation events may be created 'on-the-fly' with voice commands.
- Fanless, diskless design for silent operation and ultra-high durability.
- Ultra low power consumption conserves energy and lowers utility bills.
- Includes true 'trigger-based' automation with advanced conditional options.
- Built-in power failure recovery feature runs events missed during outages when power is restored.
- Includes USB and Ethernet ports for integration with the most commonly used technology interfaces.
